Interrelationships

James L. Sandrik, Ph.B., M.S., Ph.D.

James Brown Jackson, D.D.S.

Crawford A. Bain, B.D.S., D.D.S., M.S.

*"Every Dentist must be an expert
in every phase of Dentistry"*

John L. Woehler, D.D.S.

January 20, 21, 1990 Orlando, Florida
8:00 AM to 5:00 PM each day

James L. Sandrik, Ph.B., M.S., Ph.D.

DENTAL MATERIALS - THE ART AND THE SCIENCE

Dr. Sandrik is a graduate of Loyola University, Chicago, Illinois and Northwestern University, Chicago, Illinois. In 1977 he became an honorary member of Omicron Kappa Upsilon; in 1978 he received the Distinguished Service Award, from McHenry County; in 1985 he was elected Fellow of the Academy of Dental Materials. He is presently Professor and Chairman of the Department of Dental Materials at Loyola University School of Dentistry in Maywood, Illinois.

More dental materials have been developed over the past 20 years than in all the years since dentistry began, bringing to the profession some truly remarkable improvements - and quite a number we would rather not remember. Dr. Sandrik will sort through the confusion and hype and establish a groundwork for selecting the best, or at least those materials most likely to succeed in the future. Candid opinion of brand names will be presented along with practical discussion of sophisticated new materials, centering on a "how it works" format, or "why it doesn't work." The scientific cover may be likened to a lady's skirt: long enough to cover the subject but short enough to keep it interesting. The lecture style will be friendly, casual and unthreatening, encouraging questions and free expression of opinions from the audience.

May 19, 20, 1990 West Palm Beach, Florida
8:00 AM to 5:00 PM each day

James Brown Jackson, D.D.S.

HOW TO WIN THE MONEY GAME

Dr. Jackson received a BA in History at Duke University, his D.D.S. at the Medical College of Virginia School of Dentistry, and an Internship, Residency and Teaching Fellowship at the Harvard School of Dental Medicine. He was named Diplomate by the American Board of Pedodontics, received a Fellowship from the American College of Dentists, a Presidential Citation from the American Dental Association and a Fellowship from the Pierre Fauchard Academy. He is presently in private practice in Charleston, South Carolina.

This seminar is designed to help one achieve financial independence in today's fluctuating economy. Most self-employed professionals recognize the critical need

to plan effectively for a financially secure retirement. Social Security will at best meet only a small portion of retirement income requirements.

The seminar will provide the tools, skills and concepts needed to develop short and long term investing skills: whether it is knowing the ins and outs of municipal bond purchasing or understanding the signs for adjusting asset allocation. The time will be spent in showing how to stay on the inside track and invest successfully. Capital accumulating, whether for retirement or a nearer goal, can be made much simpler by understanding the investment alternatives available in the market and selecting those most appropriate to meet one's objectives.

Dr. Jackson draws on his extensive study and personal experience to assist dentists in meeting their financial needs and goals. Because of his intense study in the field, he has become a widely recognized authority on retirement and financial planning for health professionals. His comprehensive knowledge, practical approach and understanding of the needs of dentists uniquely qualifies him as a dynamic leader in this complex and often confusing area.

September 9, 10, 11, 12, 1990 Halifax, Nova Scotia
8:00 AM to 5:00 PM each day

Crawford A. Bain, B.D.S., D.D.S., M.S.

ORTHO-PERIO-RESTORATIVE INTERRELATIONSHIPS

Dr. Bain graduated from Glasgow University in Scotland in 1969 and conducted a general dental practice in Glasgow for 4 years. After one year in Churchill Falls, Labrador, he settled in Halifax, completed his D.D.S. and then pursued graduate studies at the University of Pennsylvania, where he obtained post-graduate certificates in Periodontics and Fixed Prosthodontics (Periodontal Prosthesis) as well as an M.S. in Education. From 1981 to 1987 he was Director of Occlusion and Head of the Division of Periodontics at Dalhousie University. He currently teaches part time and maintains a private practice limited to periodontics, prosthodontics, implantology and TMJ management. Dr. Bain has lectured extensively across Canada, in the United States, Europe and Africa.

While most dental education produces clinicians well able to complete individual dental procedures, it often falls short in areas of complex treatment planning and the interrelationship of the various dental disciplines. The purpose of this program is to present a rational, research based approach to the multi-disciplinary

management of the adult with complex dental needs, incorporating modern technology in managing an aging and more dentally aware population.

Topics to be presented include:

- Diagnostic Data Gathering for the multidisciplinary case
- Treatment options in the partially edentulous. The integration of fixed, removable and implant prosthetics into comprehensive care. Planning for success.
- Don't accept the unacceptable.
- Medico-legal considerations, prevention of problems and the use of a true, informed consent.
- Inflammatory control before, during and after orthodontics.
- Periodontal surgery in the orthodontic case, what, when and how? Grafting, impacted cuspids, frenectomy and cosmetic periodontics.
- Occlusal objectives in the multidisciplinary case.
- Periodontal preparation for restorative dentistry. Needs for crown length, keratinized tissue, ridge preparation for pontic aesthetics and smile line symmetry.
- Removable prosthodontics - periodontal guidelines to ensure long-term success.
- The implant abutment; soft tissue preparation and correction to minimize problems.
- Sequence of therapy in anterior flaring and posterior bite collapse cases.
- Uses and abuses of biteplanes.
- Customized maintenance for advanced cases.
- Retreatment; turning a failure into a maintenance problem, building to the weakest link. Use of temporary cements, telescopes and flexible treatment planning to simplify retreatment needs.

The Woehler Research Group will hold its annual meeting in Halifax, Nova Scotia and autumn is an especially pleasant and colorful time to visit there. Halifax was the first English settlement in Canada, founded in 1749 by General Cornwallis. Respect for its heritage is reflected in the preservation and restoration of historic buildings erected by British and American immigrants of past centuries. Though Halifax is no longer "small town," Haligonians haven't forgotten how people should be treated and are more than willing to help visitors.

WOEHLER RESEARCH GROUP

Dr. James D. Booth President
 Dr. Allan C. Foley Vice President
 Dr. Jeb Stuart James Secretary Treasurer
 Dr. John V. Woytowitz Program Chairman

Dr. R. Watson Bacon Eustis, Florida
 Dr. Albert J. Bauknecht Jacksonville, Florida
 Dr. James D. Booth Orlando, Florida
 Dr. Bruce E. Brooks Lake Worth, Florida
 Dr. Allan C. Foley Delray Beach, Florida
 Dr. Phillip M. Golden Winston-Salem, North Carolina
 Dr. Harry Gruen Starke, Florida
 Dr. Terry A. Hornaday, Jr. ... West Palm Beach, Florida
 Dr. Jeb Stuart James Bay City, Texas
 Dr. Hulon T. Lawson West Palm Beach, Florida
 Dr. James H. Lee Goldsboro, North Carolina
 Dr. Brian C. Lynn Tampa, Florida
 Dr. Lewis J. Marchand Tampa, Florida
